EDUCATION

Nanyang Technological University, Singapore

| August 2024 - Present

Bachelor of Computing (Honours), Computer Science

- CGPA: 4.00/5.00

Nanyang Junior College, Singapore

| January 2022 - November 2023

GCE A-Levels

WORK EXPERIENCES

AIP Venture Partners

| May 2026 - August 2026

Software Engineering Intern

- Replaced manual fund administration workflows with a single end-to-end platform, built on Next.js, TypeScript, and Supabase, spanning 165 API routes with RLS-enforced access control.
- Aligned platform calculations and reporting with regulatory and audit requirements, applying fund accounting knowledge across an 82-migration schema with a full audit layer.
- Improved daily usability for fund admins by designing a custom interface and design system tailored to their existing workflows.
- Built an LLM-based extraction pipeline (Claude API) to parse Korean-language fund audit reports, financial statements, and bank statements, using prompt caching and concurrency-gated request budgeting to control cost and latency.

Recruit Express

| April 2024 - June 2024

HR Recruitment Consultant Intern

- Collaborated with senior consultants to streamline the recruitment process using digital tools and internal databases.
- Screened and shortlisted ~10 candidates daily, aligning profiles with client requirements.
- Analyzed candidate workflows to improve screening efficiency.
- Coordinated 15+ interviews, managing communication between candidates and hiring managers.

PROJECTS & HACKATHONS

SQL Data Analytics Personal Project

| May 2026

Project title: E-Commerce User Retention & Engagement Analytics

- Built an end-to-end 3-layer data pipeline (raw → clean → warehouse) in PostgreSQL across 100k orders.
- Performed data cleaning on 9,000+ bad rows and aggregated to daily/monthly grain to optimise query performance.
- Wrote advanced SQL (CTEs, window functions, subqueries) for cohort retention, RFM segmentation and rolling MAU, surfacing the key business insight that 52% of users are Lost/At-Risk with >90% one-time buyer rate.

SC4031 Internet of Things: Communications & Networking

| January 2026 - May 2026

Project title: Banana Ripeness Detector

- Built a Flutter mobile app that offloads AI inference from iPhone to Google Cloud VM via REST API, achieving real-time banana ripeness classification into 4 categories
- Trained MobileNetV2 model using transfer learning on 13,478 images, achieving 97.69% test accuracy
- Deployed Flask server on Google Cloud VM with systemd auto-restart, static IP and threaded support for multiple concurrent users
- Implemented online model updating feature allowing real-time retraining of cloud model using user corrections

SC2006 Software Engineering

| January 2026 - May 2026

Project title: VibeChecker

- Built a school comparison platform integrating Singapore's OneMap API and data.gov.sg with an interactive React Leaflet map featuring CCA/subject filters and nearby amenity discovery.
- Designed RESTful Express API (Controllers → Services → Repositories) backed by MongoDB with server-side caching.
- Conducted comprehensive test coverage using Vitest across both backend and frontend, including unit tests for utility functions and integration tests for API endpoints.

iNTUition Hackathon

| February 2026

Project title: Bank Buddy

- Built a banking website with voice-first navigation (LLM APIs) and real-time gesture recognition (TensorFlow.js) for touchless UI control.

- Added LLM-based real-time translation for multi-language support.
- Wrote unit tests for utility functions, integration tests for API endpoints, authentication flow tests, transaction atomicity verification and accessibility compliance checks.

SC2002 Object Oriented Design & Programming

| January 2025 - May 2025

Project title: HDB BTO Management System

- Developed a multi-role HDB management system in Java (ODDP) for 3 user types: HDB officer, HDB manager and HDB applicant.
- Built a custom File I/O persistence and filtering, reducing data redundancy by 30%.
- Grade: A-

Nanyang Research Program

| April 2022 - March 2023

Project title: NIE03 Examining Time Management Skills Among University Students in Singapore

- Conducted a quantitative research on time management skills and procrastination among university students using 100+ survey responses.
- Performed statistical analysis (t-tests) to evaluate our hypotheses.
- Co-authored a research paper under the guidance of an NTU professor.
- Presented findings to a panel of professors, attaining the Gold Award for research excellence.
- Award: Gold

CO-CURRICULAR ACTIVITIES

NTU Varsity Tchoukball

| 2024 - Present

Member

- Represented NTU in external tertiary competitions such as SUNIG and ITC, attaining 2 Runner up in AY 2024/2025 and Champions in AY 2025/2026.

Tchoukball Centre of Excellence, National Team

| 2023

Member

- Represented Singapore to compete in the 6th World Youth Tchoukball Championships under the M18 girl's category and attained 1st place.

Union Orientation Committee

| 2024 - 2025

Assistant Guild Leader (Safety)

Hall 10 Dinner and Dance Main Committee

| 2024 - 2025

Vice President

SKILLS

Programming: C, C++, Java, Python, TensorFlow.js, TypeScript, TailwindCSS, Dart, Flutter, Flask, Keras

Technical Skills: Data Analysis, T-test Hypothesis Testing, Microsoft Office Suite (Excel, Word, PowerPoint), Power BI

Transferrable Skills: Leadership, Critical Thinking, Patience, Adaptability, Effective Communication

Languages: Proficient in English, Chinese and Korean

HOBBIES AND INTERESTS

Baking, Travelling, Sports (Tchoukball, Badminton, Volleyball)
